

Technology For All
Fact Sheet: Tech Host Agency
2023 - 2024

The purpose of Technology For All training is to help people with an Intellectual or Developmental Disability, their families, professionals, allies, and advocates to learn how technology can help enhance people's independence and to overcome the digital divide.

The purpose of the Tech Host Agency is to provide support to people with I/DD to be able to fully participate in the Tech Training.

What does being a Tech Host Agency mean?

As a Tech Host Agency, we want you to recruit and support at least five people with I/DD to attend tech training. This might mean everyone is attending individually, using their own computer or as a group in a conference room on one computer with a projector. You would provide the support they might need such as registering, attending the optional pre-meeting, joining the event, using Zoom, etc.

What help do you receive?

We will provide an optional Zoom pre-meeting session a week before the Tech training to meet people, answer any questions, and make sure everyone is able to fully participate in the training using Zoom as the platform.

We will highlight your agency as a Tech Host Agency supporter on our Webpage and provide an acknowledgement during the training itself.

See the MyTechForAll website to register and for more information www.mytechforall.com
